TOPLINE CASSETTE

SLIM **STYLING** AND
TIMELESS **ELEGANCE**

**MORE THAN JUST A
PREMIUM AWNING**

**UNBEATABLE OPTIONAL
EQUIPMENT**

THE TOPLINE CASSETTE IS SETTING NEW STANDARDS

With the new TOPLINE Cassette, we have given our highly sought-after top awning model something of a facelift. Needless to say, however, its main benefit remains unchanged: both the cloth of the blind and the jointed arm retract inside the casing, making this premium awning much more durable.

All other benefits at a glance:

- System widths up to 7 metres
- Long projection of up to 4.5 metres
- Vario valance for systems with a projection of up to 4 metres
- Extensive selection of fabrics and colours
- Cloth of the blind and arms retract fully inside the cassette
- High wind stability
- Radio motor io homecontrol fitted as standard
- Optional: LED light strip and vario valance

TOP QUALITY,
TOP TECHNOLOGY,
TOP DESIGN

INTEGRATE COUNTLESS EXTRAS

The new way of integrating the **LED profile** – flush with the surface – also contributes to the unique design, creating an even, continuous light strip without any dark ends.

The **vario valance** is now integrated directly into the fallbar, while the awning can also be fitted with wind and sun sensors.

SLIM STYLING AND TIME-LESS ELEGANCE

The **modern, stylish shape of the casing** was created in collaboration with a well-known design agency. It enables the awning to fit harmoniously into any setting, be it modern architecture or the historic square of an old town.

SOPHISTICATED AND ELEGANT

Another unique feature besides the new, attractive design is how all the electrics are integrated. Installation is now much easier because only a single plug connector is required.
